- Labor Management
- Kitchen Display System
- Profit Management

Guest Engagement

Engage guests in-venue and online to keep them coming back for more.

- Loyalty
- Marketing
- Gift Cards
- Online Ordering
- Reservations

Get started with the Top POS Solution for your Restaurant

The screenshot displays the odoo POS interface. At the top, the 'odoo' logo is on the left, and navigation options like 'BACK' and 'Mitchell Ad' are on the right. The main menu is a grid of food items with images and prices. A 'Your Order' summary is overlaid on the right, showing items like 'Club Sandwich' and 'Espresso' with their respective quantities and prices. At the bottom, there's a payment section with a table for entering payment details and a total amount of \$9.32.

Features

Restaurant Management System

Restaurant Management

Custom floor plans

Customize the floor plan (add, move, or remove tables and seats) and make changes using the graphical editor.

Take orders & Table transfer

Assign any table to your clients and Transfer your customers from one table to another.

Manage seating

Keep track of your guests with an overview of your restaurant's capacity and table availability.

Kiosk

Let customers place and pay orders from a self-service kiosk.

Kitchen display

The display of the kitchen and its categories lets your staff know which orders must be prepared and when to ensure smooth service.

Kitchen order notes

Add notes for customer's preferences, allergies, or special requests and send them to the kitchen or bar printers.

Delayed orders

Take orders for different courses of the meal at once with the ability to send them to the kitchen printer at separate times.

Self-ordering & Bill Splitting

Customers can scan a QR code to get the menu, place orders from their devices, and eventually, pay online. And also let customers pay separately or at different times by splitting orders.

Combo meals

Sell food through easy-to-configure combo meals.

Table booking

Tables can be booked online using Odoo Appointments. Reserved tables are displayed on the floor plan in restaurants or bars.

Features

Restaurant Management System

Checkout

Prices & discounts

Set customer prices or offer percentage-based discounts on either a single product or the entire order.

Parallel orders

Put orders aside and process multiple orders at the same time.

Customized receipts

Advertise your current promotions, hours of operation, and upcoming events on your printed receipts.

Weighting at the counter

Calculate product weight during checkout with the electronic scale integration.

Multi-step checkout

Order your products at one point of sale and pay at another one.

Sell on the move

With iPad and Android tablet support, sell anywhere within your store or restaurant.

Dynamic barcodes

Embed price, weight, and loyalty programs directly into your barcodes.

Features

Restaurant Management System

Payments

Payment methods

Cash, checks, and credit card payment methods are available. More payment methods can be added if needed.

Credit/Debit cards

External payment terminals handle all electronic payments.

Bill splitting

A single order can be paid as a split payment between multiple parties and with separate payment methods.

Currency rounding

Prices and payments can be rounded to the smallest denomination of the currency.

Offline payments

Orders made offline are automatically synchronized when you are reconnected.

Invoicing

Generate and print invoices for your business customers.

B2B

Register your customer's VAT number and apply it to invoices.

Accounting

Payments are directly integrated into Odoo Accounting to make bookkeeping simple and reliable.

Customer tips

Supports customer tipping as an added amount or by converting change to a tip.

Credit limits

Credit limits can be set on companies or partners. When a limit is reached, a warning appears on customer-related views and buttons.

Prevent cash payment method re-use

Cash payment methods and cash journals cannot be re-used over multiple POS to avoid accounting issues related to cash drawer control.

Features

Restaurant Management System

Store Management

Order history

View all past orders. Search them by customer, product, cashier, or date.

Franchises

Pre-configure your franchise stores, overview their sales, and centrally manage their stock and accounting.

Cashier accounts

Manage multiple cashier accounts and secure them with badges or pin codes.

Cash flows

Monitor cash register adjustments and easily verify cash content at the end of the day.

Stock & Inventory

Monitor your stock in real-time, manage your inventory across all locations, and review shipments with the Odoo stock integration.

Daily sales

Keep track of daily sales and totals for every payment type.

Self-service

From the kiosk or their smartphone, your customers can do everything themselves, from order to payment.

Preparation display

Know from your tablet which order must be prepared and when.

Features

Restaurant Management System

Products

Product categories

Organize your products with hierarchical product categories. Order them by popularity and display different categories at different points of sale.

Product search

Quickly find products by name, barcode, or description with the built-in search function.

Units of measure

Sell your products with custom or preset units of measure and update your stock accordingly

Multiple barcodes

Configure multiple barcodes for the same product with barcode nomenclatures.

Product variants

Sell different sizes, colors, or configurations of the same product with product variants.

Product availability

Decide whether or not a product appears available or out of stock at your point of sale.

Ship later

Sell products, arrange delayed delivery, and choose the desired shipment date.

Gift card

Sell gift cards of any amount with or without a validity date.

Weight your product

Decide if a product must be weighted using an integrated scale.

Features

Restaurant Management System

Customer Loyalty

Frontend customer registration

Identify your customers by registering their email and contact address, allowing you to keep track of individual sales.

Customer discounts

Create and offer discounts to retain customers and increase your revenue. Discounts can be permanent, time-limited, or seasonal.

Loyalty cards

Reward your customers with loyalty points and exchange them for gifts or discounts. Points can be earned by product, order, or sale amount.

Identify customers

Look up your customers with the built-in search feature or identify them with a barcode printed on their loyalty card.

eWallet

Credit your eWallet via top-up or product refund. Bump up retention while keeping your clients happy.

Pricelists

Use pricelists to adjust product prices automatically (eat-in or takeaway). Set POS-specific prices, create temporary discounts, reward specific customers, or offer discounts when set quantities are ordered.
