Vision and Mission

Charting Our Course, Our Purpose and Aspiration

Vision

To become the premier digital solution provider, renowned as the go-to name for comprehensive digitization services across industries.

Mission

Our mission is to empower businesses to revolutionize their operations, drive innovation, and foster growth through the strategic implementation of cutting-edge digitalization technologies and tactics.

Our values

Both our Identity and our Promise

There are some things we believe in as a team, principles that were laid out by the founders of Synavos at inception. Since then, they have spread like a culture, shaping how we think, interact and work.

1

Excellence

By giving attention to every detail, we create a product that surpasses the status quo.

2

Dependability

We endeavor to always deliver what we promise, to meet every deadline, and to communicate proactively.

3

Community

We act as catalysts for positive, long-term growth for the community to make this world a better place for all.

4

Be Human

We want to create a culture that makes Synavos a learning hub for young minds to interact, learn and grow.

Cloud

From ideation to execution

We don't just shoot for stars, we carefully set the galaxy to make the project Sirius!

Collaboration Tools

Harness the power of tribal knowledge

Effective virtual collaboration is to surpass the confines of time and space. We deploy the best practices and collaborative technology tools that not only aids the flow of information but also builds a support system that plays to harness the strengths of each team.

Our Promises

Rock-Solid Value Proposition

Concept to completion

We take your project from ideation to final delivery.

A customized solution

We tailor build solutions to meet your needs.

Cross-functional teams

Our creative heads and managers work together.

Develop to perfection

Lean and clean development for a well engineered output.

Awesome support

We provide 27x7x365 system support and monitoring.

Going the extra mile

We work as partners to achieve your goals.

Customized Engagement Models

Synavos offers a wide range of nearshore and offshore development services, and our well-defined engagement models ensure that we can maximize the benefits of outsourcing, whether you are an ISV, SME or a large enterprise.

Staff Augmentation Model

Staff augmentation is a resource augmentation model that allows you to set up a near or offshore subsidiary of your organization with the full support of a local IT outsourcing partner. It offers greater operational control and opportunity for overseas expansion.

All-in-one Solution Model

If you have got an idea for a brilliant product, this model offers best solution for you. It follows a milestone-based roadmap proven to lower the risk for all your operations while optimizing the design and development efforts. From discovery to the market, we take care of every aspect of the product.

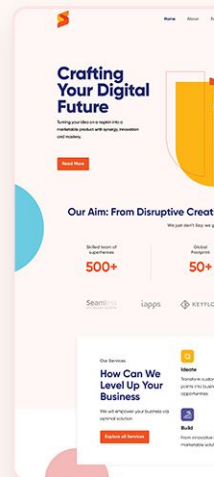

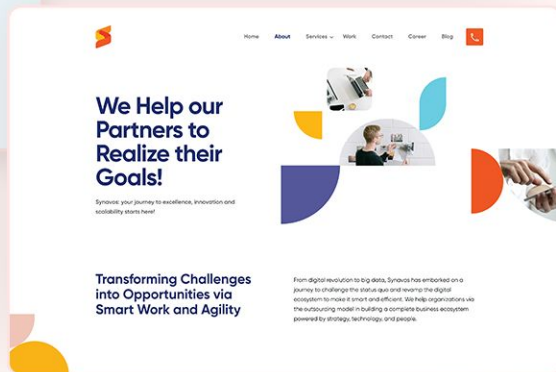

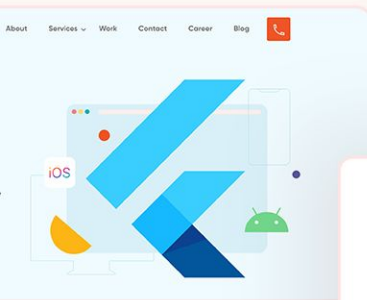

BPO Model

Business Process Outsourcing model allows large and medium-scale enterprises to outsource their core or non-core business operations to us and benefit from high-quality services while maintaining cost-effectiveness.
