

synavos

Tuned to the Pulse of Future Tech

Synavos is all about going an extra mile to achieve digital goals, be innovative, and build partnerships in the ICT businesses.

About us

Transforming Challenges into Opportunities via Smart Work and Agility

From digital revolution to big data and AI innovation, Synavos has embarked on a journey to transform the digital landscape into an intelligent and streamlined ecosystem. We help organizations via our strategic outsourcing approach in building a complete business ecosystem with its innovative strategy, cutting-edge technology, and a skilled workforce.

Our values

Both our Identity and our Promise

There are some things we believe in as a team, principles that were laid out by the founders of Synavos at inception. Since then, they have spread like a culture, shaping how we think, interact and work.

1

2

3

4

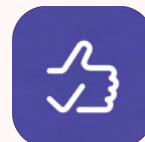

Excellence

By giving attention to every detail, we create a product that surpasses the status quo.

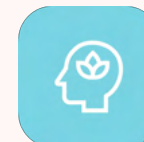

Dependability

We endeavor to always deliver what we promise you, to meet every deadline, and to communicate proactively.

Community

We act as catalysts for positive, long-term growth for the community to make this world a better place for all.

Be Human

We want to create a culture that makes Synavos a learning hub for everyone to interact, learn and grow.

Our Promises

Rock-Solid Value Proposition

Concept to completion

We take your project from ideation to final delivery.

A customized solution

We tailor build solutions to meet your needs.

Cross-functional teams

Our creative heads and managers work together.

Develop to perfection

Lean and clean development for a well engineered output.

Awesome support

We provide 27x7x365 system support and monitoring.

Going the extra mile

We work as partners to achieve your goals.

Customized Engagement Models

Synavos offers a wide range of nearshore and offshore development services, and our well-defined engagement models ensure that we can maximize the benefits of outsourcing, whether you are an ISV, SME or a large enterprise

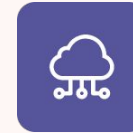

Staff Augmentation Model

Staff augmentation is a resource augmentation model that allows you to set up a near or offshore subsidiary of your organization with the full support of a local IT outsourcing partner. It offers greater operational control and opportunity for overseas expansion.

All-in-one Solution Model

If you have got an idea for a brilliant product, this model offers best solution for you. It follows a milestone-based roadmap proven to lower the risk for all your operations while optimizing the design and development efforts. From discovery to the market, we take care of every aspect of the product.

BPO Model

Business Process Outsourcing model allows large and medium-scale enterprises to outsource their core or non-core business operations to us and benefit from high-quality services while maintaining cost-effectiveness.

Our Strategic Network

Building mutually beneficial relationships and nurturing them with transparency and integrity

Enterprise Solutions Implementation Process

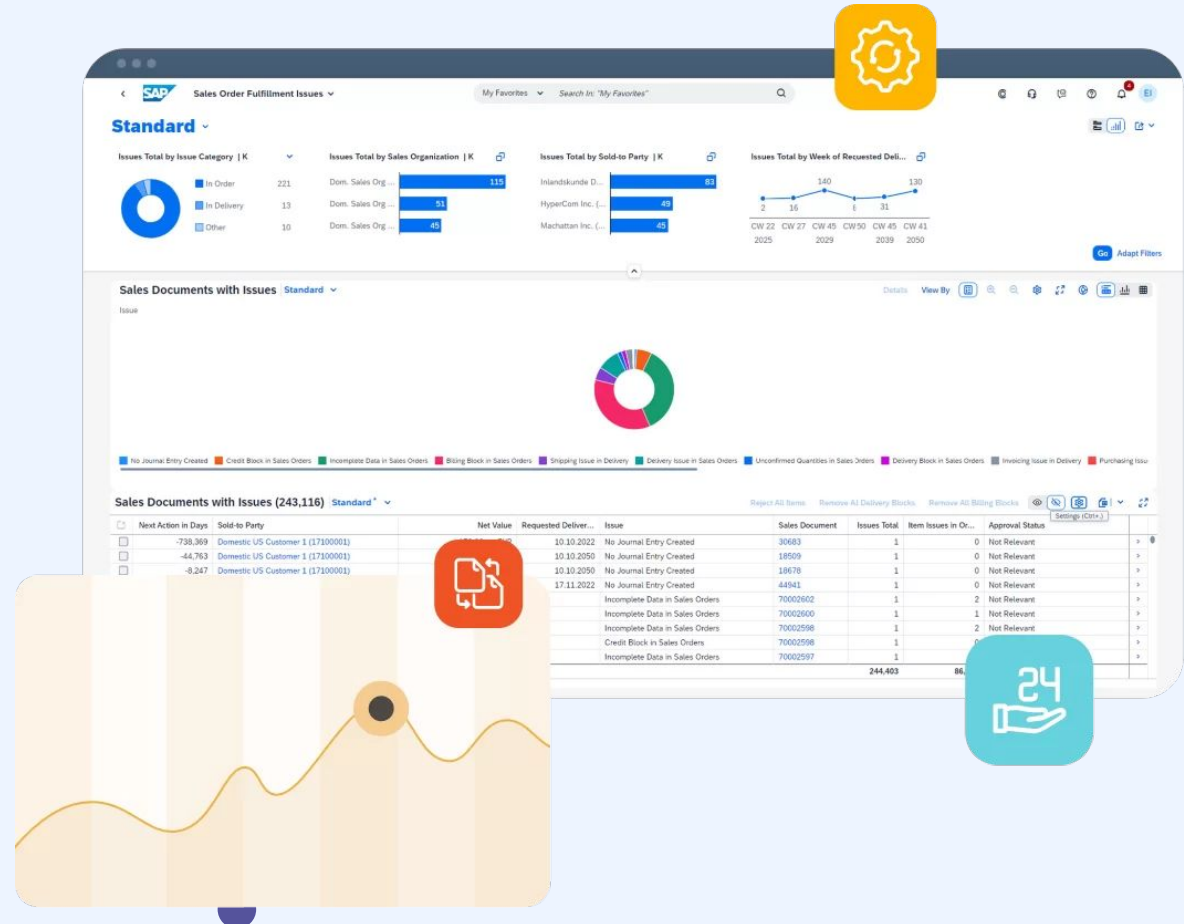

Powering Business Growth

Streamline your operations and gain real-time visibility with SAP Business Technology Platform, a suite of powerful ERP solutions engineered for performance and growth.

- Robust financial management capabilities.
- Efficient inventory control.
- Real-time insights for agile decision-making.
- Ideal for businesses aspiring for sustainable growth.

شركة أرتيكس للإستثمار الصناعي
ARTEX INDUSTRIAL INVESTMENT CO

ARTEX formerly **Al-Abdullatif** is a leading Saudi manufacturer specializing in carpets, blankets, and textiles, with a strong legacy of excellence and innovation. With multiple production facilities, ARTEX is one of the largest companies in the region.

ERP Implementation & Historical Data Cleansing

Synavos has secured a major two-year ERP implementation project with ARTEX Group for its 10 companies. The project includes historical data cleansing for past three years, migration to a new ERP system and new SAP system implementation. The project is aimed at improving operational efficiency and decision-making across all entities and their operations under ARTEX Group.

ARTEX Group
Business Entities

Eastern Textile, Western Textile, Daniya Fiber, Nadeen, Shahd, First Carpet Company, ADFA

HARBIN ELECTRIC CORPORATION

Harbin Electric International (HEI), a global powerhouse in power engineering and construction, has initiated a strategic partnership with Synavos to implement SAP Business One across its financial operations. This digital transformation aims to centralize data, improve financial oversight, and streamline core business processes, setting a strong foundation for scalable growth and better decision-making.

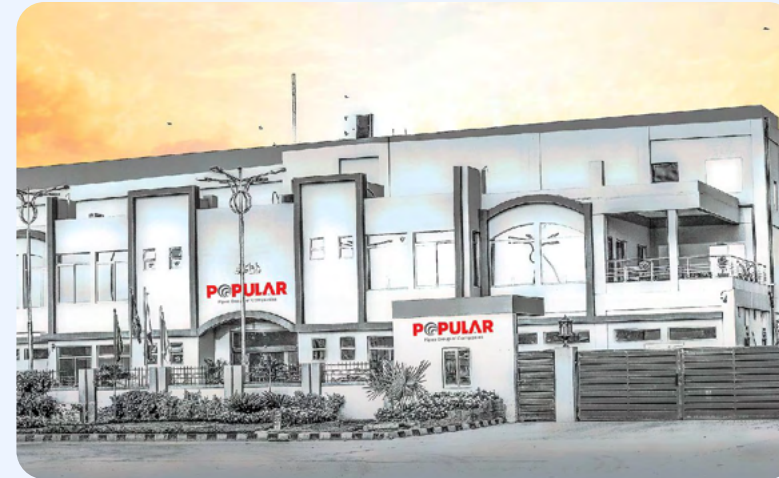

A key highlight of this engagement is the integration of Synavos' custom-built Plant Maintenance module. Tailored specifically for HEI's industrial project environment, this module will bring structure and automation to maintenance workflows, enabling proactive asset management and operational continuity across large-scale infrastructure sites.

Synavos is partnering with Popular Pipes Group (PPG), a leading manufacturer of PVC and HDPE pipes, to address challenges in their SAP Business One implementation, including inefficiencies, high licensing costs, and lack of HRMS features.

- Reconfigure SAP Business One to resolve system issues.
- Develop a custom Data Entry Portal to reduce license costs.
- Implement Odoo HRMS for unified HR and payroll management.
- Provide Synavos SLA support and cloud migration for scalability.
- Configure & Implement Data Entry Portal to address the increasing users and limited licenses issue.

AHMED SULTAN

A leading clothing brand overcame operational challenges by adopting SAP Business One (SAP B1) with our tailored solutions. Our four-month partnership addressed inventory tracking, production cost management, and financial visibility, resulting in improved efficiency and profitability.

-30%

Inventory Loss

-35%

Automated CRM Solution

HRMS with Payroll

Nishat Chunian has hired Synavos for ERP services at one of their entity **The Linen Company (TLC)**, to address operational inefficiencies in their current POS system and enhance overall business performance. TLC seeks a modern ERP and POS solution integrated with Oracle EBS and third-party systems to streamline operations and improve customer engagement.

- Implement Odoo POS with modules for Sales, Inventory, and Point of Sales.
- Integrate with Oracle EBS, Shopify store, courier systems, and FBR system.
- Introduce custom features like customer loyalty management, payroll, attendance, dashboards, and reporting.
- Integrate with attendance and email systems.

Synavos's Odoo implementation services effectively addressed our reporting and ledger issues, significantly improving our financial reporting. We have achieved significant results with their support and found their resourcefulness and client focus invaluable.

Zahid Malik
Director IT JW Holdings

A renowned name in innovative business ventures recently leveraged our expertise with Odoo Online 17. With meticulous transaction recording, structured workflows, and proper user permissions implemented at JW Holdings, enhanced their overall business functionality.

Improved & Efficient Workflows

Accurate Budgeting & Costing

Prevention of fraud

Optimized Inventory Management

Sazgar Engineering is a leading automotive company with a strong presence across multiple regions, focusing on producing quality vehicles. Our intervention with Odoo centralized data management and helped them prevent information loss and enhance data visibility.

Streamlined customer data management.

Improved sales efficiency.

Enhanced lead tracking and conversion.

Boosted customer loyalty.

DWP Home, a core division of **DWP Group**, plays a central role in Pakistan's consumer electronics market. As the official distributor of **GREE** and **EcoStar**, it manages large-scale sales, warranty, and after-sales operations. Our Odoo 18 Enterprise implementation digitizes and centralizes these operations.

Centralized end-to-end complaint management

Real-time coordination between all departments

Reduced manual paperwork

Improved experience & service transparency

Hush Puppies®

Hush Puppies, a globally recognized footwear brand, is known for its comfortable and stylish shoes. With a strong retail and wholesale presence, they sought to streamline their operations for better efficiency. **Synavos** is implementing Odoo 18 to optimize their workflows and enhance operational efficiency.

Key Implementation Highlights:

- Implemented Odoo 18 to optimize retail and wholesale workflows.
- Integrated POS for seamless in-store transactions.
- Automated procurement and inventory workflows for efficient supplier management.
- Enhanced claims & repair processes for improved customer service.

Green Agritech Farms, a Pakistan

Army-owned firm specializing in sustainable agriculture and crop yield improvement, has engaged Synavos to develop a comprehensive agriculture and farm management system.

Key Project Highlights:

- Developing a robust Agriculture & Farm Management System to manage multiple farm locations.
- Streamlining crop management and order processes with real-time tracking.
- Implementing disease management and incident tracking to ensure crop health.
- Enabling report generation for efficient farm and crop performance monitoring.

Software Solution Engineering

Out of all our services to Seamless it has the highest percentage. A headcount of more than sixty containing three architects, two cluster managers, and ten development teams are responsible for the complete custom development and support of the following products and services to SDS.

How It Started

From major outsourcing reservations to mutually beneficial & strategic bond

The Challenge

Major reservation on part of Seamless about outsourcing its core operations like Software Development. The reservations came from their no so good past experiences that hindered them from going down that path.

Our Plan & Engagement Model

Starting with just a handful of resources to now a team of more than 180 built over the years. Our services expanded from being solely operational to the generation of sustainable and profitable business for Seamless Distribution.

Results-driven approach ensuring success

What our Engagement Model Ensured

Our strategy with Seamless Distribution Systems was to effectively deliver their commercial goals and build trust along the way. Thus, complete transparency in the workflow and business operation was the ingredient to mutual success. We provided them with a remote team.

- Transparency: back and forth communication
- Onsite onboarding
- Project automations via tried & tested tools
- Daily, weekly, & monthly standup meeting
- Agile methodology
- Open door policy
- Direct access to team
